A sound system, a speaker assembly, and a method for providing sound to a spa are disclosed. The sound system includes a source of sound waves and at least one sound wave guide adapted to transmit sound waves from the source of sound waves to a location in the spa where the sound waves can be heard by an occupant of the spa. The speaker assembly includes a surface having perforations and at least one sound wave guide adapted to transmit sound waves from the source of sound waves to the perforations. The method includes providing a source of sound waves and transmitting the sound waves through at least one sound wave guide so that the sound waves can be heard by an occupant of the spa. The sound system, speaker assembly, and method may be used to introduce audio to a tub, spa, pool, bath, or shower, among other enclosures.
